BUY BTC

Sell BTC

Your balance: 0.00 BTC
Bid: 1 734.398 DKK/BTC

Amount BTC: BTC

Price per BTC: DKK

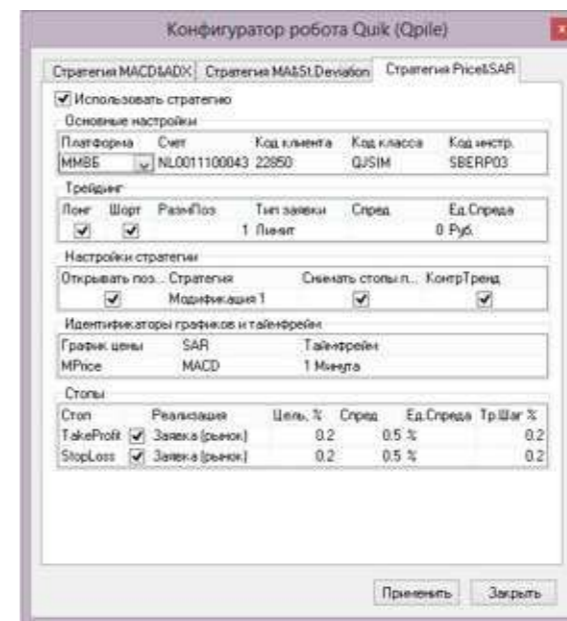

Total: DKK

Fee: 0 DKK

SELL BTC

2 With the help of robots-traders (API)

Public API и Private API of the platform allows to use ready-to-go robot software
Fully automated trading

TYPES OF ORDERS INTERACTION AT THE PLATFORM

1 **The orders (Bid and Ask) are equal in value.**

Orders are executed.

2 **The Ask Order is greater in value than the Bid Order.**

The orders are not executed till there is a suitable Order.

3 **The Ask Order is lesser in value than the Bid Order.**

The orders are executed. The difference between two Orders creates a surplus which is posted as an exchange income.

ADVANTAGES

- **System authentication**

Google two-factor authentication for platform access and funds withdrawal.

- **Wide opportunities to deposit funds**

A separate account for each currency. Cryptocurrencies are deposited through the special address generation, fiat money through the payment systems or bank transfer.

- **Exchange statistics monitoring**

A convenient tool for technical analysis of the currency market in the form of candlestick chart.

- **E-mail notifications**

In-time email notifications for the trader dedicated to the most important events that require his attention.

- **Multilingual and multicurrency**

Opportunity to add any language version and currency pair.

- **API usage**

Full featured internal API allows you to automate the exchange trading, algorithms, manage orders and follow the exchange rates by using the automatic programs-traders, use the exchange data (rate, statistics and much more) for publication and display on the third-party resources.

EXCHANGE ADMINISTRATION

Flexible monetization

- ✓ Dynamic commission depending on the user's transaction volume.
- ✓ Opportunity to set up individual tariff plans for the users.
- ✓ Limits to the automatic withdrawal of funds beyond the amount originally entered.
- ✓ Income as a surplus from executed orders where the Ask Order is greater in value than the Bid Order.

User management and control
